

Updating Funding Source values in records prior to 9/1/2015

When updating the funding source in an existing record, the dropdown list of available values only displays the funding sources active on the date the update is made. This means that when you are updating older records, if the appropriate funding source has been inactivated under Maintenance, you will have to reactivate the code prior to its use. Because counties are updating old records to clean up data related to the Funding Source Audit and the Comprehensive Data Audit, a higher number or old records have been updated recently. Your department has two options regarding activating retired funding sources so that they can be used in older records.

1. Under Maintenance, you can activate the funding source by removing the Retirement Date. Once the funding source is reactivated, make the necessary funding source updates. Then go back to Maintenance and deactivate the funding source by entering the original retirement date.
2. If you find that you have a large number of older records to update or you received funding source errors on multiple extract reports over the last few months, you can reactivate the retired funding sources and leave them 'active' so that they can be used in older records. If you select this option, we strongly recommend that the Funding Source Description be changed to include 'ZZZZ' in front of the description. Adding the ZZZZ will move this funding source description to the bottom of the dropdown list and will indicate to your data entry staff that the funding source is retired and should not be used in current records. As an example 'N Grant – Mental Health Services' was retired on 9/1/2015. Modifying the description to 'ZZZZ N Grant - Mental Health Services' with no Retirement Date allows you to use this funding source in older records, but indicates to staff that this funding source should no longer be used for current records.

Edit Funding Sources

*Funding Source Description:

*Activation Date: 

Retirement Date: 

*TJJD Funding Source Type: 

Below is the list of valid funding source types before 09/01/2015 and valid funding source types on or after 09/01/2015. We have included this information to assist you in selecting the appropriate/valid funding source.
