Texas Student Data System
(TSDS/PEIMS) on the Way In

TSDS/PEIMS Stage 1 Launches Aug 2015

TEA is rolling out TSDS PEIMS to half of the LEAs in Texas.

These LEAs will submit their official PEIMS collections via TSDS, although they can also load to EDIT+ during the 2015-16 school year for data quality assurance. They will not, however, complete their data via EDIT+, as TSDS PEIMS is now their system of record.

PEIMS Stage 1 and 2 LEAs, and dashboard adopters

This section of this website includes resources for LEA administrators as they begin deploying TSDS. The website also includes a [Technical Resources](#) section for LEA technical staff and vendors looking for technical specifications for deployment.

What is TSDS Unique ID?

TSDS Unique ID (10 digits) will enable education agencies to create randomly generated unique identifiers to support all the subsystems of TSDS and to provide cleaner longitudinal education data.

TSDS (1)

TSDS will become the **one common data collection platform** for TEA to reduce the data collection burden on districts and charter schools.

TSDS (2)

- TSDS replaces and expands on the existing Public Education Information Management System (PEIMS)
- TSDS modernizes to reduce technology risk and system downtime
- It puts **real-time student performance data in the hands of educators**

TSDS (3)

TSDS Unique ID is necessary in order to integrate the various subsystems of TSDS smoothly and accurately--it is better able to reduce duplicates and other errors than TEA's previous identification management system.

TSDS (4)

Since TEA will run both TSDS and the legacy EDIT+ systems in parallel for some time, EDIT+ has been adapted to accept Unique ID identifiers (UIDs), and LEAs must use UIDs for both systems.
