GRANT EVALUATION PANEL SCORE SHEET

TEXAS JUVENILE JUSTICE DEPARTMENT

Please be aware that reviewer scoresheets are subject to the Open Records Act.

Reviewer:					
Total Score:		Recommended Funding? (F/P/N)		If Partial, funding recommended:	

SECTION A: APPLICATION DETAILS			
APPLICANT DEPARTMENT		**PROJECT TITLE**	
PROJECT PERIOD REQUESTED		**AMOUNT REQUESTED**	

SECTION B: APPLICATION SCORING

Score responses on clarity and effectiveness and include relevant comments.

	Points Possible	Points Given	Comments
1.TARGET AND PRIORITY POPULATION: Application defines the improvement to be addressed with the proposed project, including target population and service gap to be filled. The proposed target population and project clearly addresses one or more of the main grant goals. Application meets at least one category named in the priority population.	20		
Skip Question #2a if Construction Grant unrelated to program enhancement/expansion			
2a. APPROACH/METHODOLOGY: Proposed approach and interventions are clearly defined and represent a sound method to address areas of need identified in the program focus. Application provides data supporting the extent of the need being addressed by the project (i.e., number in the target population within the target service area, history of TJJD commitments from target population, history of target population moving deeper into the juvenile justice system, data demonstrating lack of the same or similar services available in the target area, etc.) 2b. SAFETY/SECURITY: Project identifies how it will ensure safety and security and how it directly supports the well-being and protection of youth, staff, and community.	20		
3. REGIONAL APPROACH/SHARING RESOURCES ACROSS DEPT AND/OR AGENCIES: The program utilizes a regional approach or is a program or facility that allows for contracting with other state agencies or probation departments. This allows for sharing of resources with other state agencies, probation departments, and TJJD departments.	20		
4. RISK/NEEDS/RESPONSIVITY FOCUS: Project identifies risk and needs of the target population, utilizes industry standard assessment tools to determine risk and needs, includes methods to track changes in risk and protective factors through the program, and demonstrates appropriate flexibility to be responsive to individual juvenile/family needs. Supportive peer-reviewed research is provided. Data collection/retention methods are identified to support that program/treatment methodology and dosages outlined in the application are appropriate to effectively address the program focus.	20		
5. COST: Does the cost of the program seem reasonable given the number of youth served, the intensity of treatment and programming needs targeted, and the type and amount of services provided? Does the application include in-kind or local financial matching?	20
